

Why work at MKK?

Since MKK was founded, we have benefitted from the skills and commitment of exceptional people. We continue to seek the best talent to consult more, consume less, and build on our story of success as we pursue our vision of high-performance focused on sustainable solutions.

Your own career success with MKK will depend in part upon the knowledge, skills and experience that you possess. However, we also seek certain common traits in our employees that enable them to thrive.

As engineering consultants, we see our teams as a means not only to solve problems but to provide leadership. At MKK, leadership is not tied to hierarchy or experience- your voice and ideas are valued regardless of your tenure.

At MKK, your potential is limited only by your talents and ambitions.

We look for individuals who:

- are passionate and driven by internal motivation to conquer new challenges;
- seek and share knowledge generously;
- are able to establish new relationships and build strong relationships over a period of time;
- are flexible/adaptable to a constantly changing environment;
- are innovative and possess an entrepreneurial attitude;
- are honest, reliable, and fair; and
- have demonstrated a commitment to a high level of customer service.

About this role . . .

This position contributes to our profitability objectives by accurately and timely completing mechanical design and technical task work on assigned multiple concurrent projects varying in size and scope through effective completion of engineering tasks and efficient utilization of lower-level task help where applicable.

The essential accountabilities of this position include (but are not limited to):

- Contributes to the productivity of the assigned business unit by consistently meeting productivity (chargeable time) goals.
- Under limited direction by higher-level engineers or designers, and using prescribed methods, applies diversified knowledge of engineering principles and practices and makes independent decisions regarding engineering complexities and methods to create designs that meet client expectations appropriate to project scope and within established project fee.
- Contributes to established project timeline and fee by accurately and timely planning weekly project schedules; coordinates time and task assignments and expectations with the Project Engineer (P/E) or Project Manager (P/M) on assigned projects; alerts P/E or P/M of potential scope changes in a timely manner.
- Effectively communicates with project team and clients through regular project status updates; resolves and/or escalates issues in a timely manner and handles difficult/sensitive information tactfully.
- Ensures that M/E/P aspects of assigned projects are completed in a timely and appropriate manner.
- Protects the firm's profitability and reputation by self-checking work prior to higher level review and consistently following the firm's established IPQ processes to avoid errors and omissions.

How to be considered for our team . . .

A successful candidate will possess the following background:

- A bachelor's degree in Architectural or Mechanical engineering with knowledge of codes and design & construction practices required.
- Minimum 4 years' work experience in an M/E/P engineering firm required.
- EIT/FE required; PE preferred.
- Valid driver's license and insurable driving record required.
- Ability to travel unassisted out-of-town and overnight for up to 10% of the time.
- Experience using Microsoft Outlook & Excel, Revit MEP, AutoCAD, Trace 700, Visual, eQuest, Computafan, 62MZ Calc, Techstreet and/or Bluebeam desirable.
- Professional appearance and demeanor appropriate to a consulting office environment.
- Demonstrated ability to work both independently and closely with others in a team environment.
- Excellent verbal and written communication skills, and demonstrated ability to effectively communicate with individuals in a variety of position levels both inside and outside the organization.

If the above characteristics describe you, we're interested in learning more about you! Here's how to initiate the conversation:

Complete our [Application for Employment](#) (indicate Requisition #201408-024), print & sign it, then send it to us (with your resume, if you wish) via one of the methods indicated on the Application form. **You'll need to use the Windows OS version of the free Adobe Reader in order to successfully complete the Application.**

If hired, you must be able to provide proof of authorization to work in the U.S. [Please note that no work authorization will be provided for this position.]
