

Commissioning Agent
Group14 Engineering

Job Description

Group14 Engineering (www.group14eng.com) is a thriving office of building energy consultants, LEED/ sustainability consultants, and commissioning agents. Our office culture is one that promotes great work while maintaining a work-life balance. We are known throughout the United States as leaders in the field for our consulting work and research in building energy efficiency. Our LEED Platinum office is located just outside of downtown Denver in the historic Uptown neighborhood.

We are hiring a motivated, creative, and experienced COMMISSIONING AGENT with excellent technical, project management, and written & verbal communication skills. We are looking for an individual with a strong commitment to energy efficiency, customer service and a responsible work ethic.

Your key responsibilities will include:

- Provide full LEED commissioning services on energy efficient and sustainable buildings.
- Prepare commissioning documentation, review building designs for energy efficiency and LEED requirements and implement building commissioning plans
- Perform site inspections, functional testing and trend data analysis to ensure that installed equipment meets the design intent, installation is maintainable, and clients' expectations are met
- Work with contractors, clients, consulting engineers, architects, and their representatives
- Work will include both documentation in the office and field testing.

Desired Skills and Experience

Qualifications

- **5+ years of commissioning commercial buildings – or –**
- **5+ years of experience in mechanical design, operating and/or maintaining HVAC systems and DDC Control Systems**
- Strong practical background of commercial buildings, DDC controls and HVAC
- Competency with Microsoft Office product
- University degree or college diploma in mechanical engineering, building systems sciences, or related field preferable (open to equivalent experience)

Company Description

Group14 Engineering is a Denver-based consulting firm committed to inspiring better buildings. Founded in 1993, Group14 Engineering provides building energy analysis, energy master planning, greenhouse gas analysis, commissioning, and LEED services. The company helps clients navigate a wide range of issues from building orientation and daylighting to building operations and product purchasing in order to achieve their sustainability goals.
