

Denver District Cooling Plant Tour

Hosted by YEA

Date: Tuesday, November 28th

Time: 11:00 AM

Duration: Approximately 60 minutes

Location: 500 15th Street, Denver, CO 80202

Discover the inner workings of this impressive facility, which utilizes an ice thermal storage system and is part of an integrated network of six plants providing over 20,000 tons of cooling power. The network serves an astounding 12 million square feet of space across downtown Denver.

Personal protective equipment (PPE) is required for the tour:

- Jeans or long pants
- Hard hat
- Safety glasses
- Safety vest
- Steel or composite toe boots

Don't miss this incredible opportunity to gain insight into Denver's district cooling system.
